

# PIs with non-uthscsa id

## Problem

PI listed on protocol contains an email address that is a non-uthscsa account.

The new animal purchase web requisition doesn't allow purchases on a protocol where the PI can't be matched to a HSC ID.

## Solution

Update PI's email address with a uthscsa account, if the PI has a UTHSCSA account. If not, contact the IACP office to determine who should be identified as the PI for the protocol for the purpose of ordering animals.
